

00001

01 CAMP CROFT RESTORATION ADVISORY BOARD MEETING  
01 \*\*\*\*\*  
02  
02 PLACE: SC School for the Deaf and the Blind  
03 Robertson Hall  
03  
04  
04 DATE: Tuesday, September 10, 1996  
05  
05  
06 TIME: 7:05 p.m. to 7:50 p.m.  
06  
07  
07 PRESENTATIONS  
08 GIVEN BY: Wayne Bogan  
08 Project Manager  
09 U.S. Army Corps of Engineers  
09 Charleston District  
10  
10  
11 BOARD MEMBERS  
11 PRESENT: David Mullinax  
12 Kathy Burrell  
12 Gary Hayes  
13 Sherry Wheeler  
13 Clary H. Smith  
14 William Littlejohn, Jr.  
14 George Mullinax  
15 Sanford N. Smith  
15 Dot Sloan  
16 Harold D. Osborne  
16 James B. Thompson  
17 Norma Borkowski  
17 Darwin J. Wilson  
18 John E. Keith  
18  
19  
19 BOARD MEMBERS  
20 NOT PRESENT: Fritz Hamer  
20 W. Brownlee Lowry  
21 Gerard Perry  
21 Robert W. Powell, Jr.  
22 Gerald T. Thurmond  
22  
23  
23 REPORTED BY: Sandy Satterwhite  
24

00002

01 INDEX  
02  
03 Welcome by Mr. Mullinax. . . . . 3  
04 Status of Removal Activities by Mr. Bogan. . . . . 3  
05 New Business by Mr. Mullinax . . . . .54  
06 Certificate of Reporter. . . . .58

00003

01 BY MR. DAVID MULLINAX:  
02 I'd like to welcome everybody to the September  
03 meeting of the Camp Croft Restoration Advisory Board.  
04 Has everybody got a copy of the Agenda?  
05 (HANDING OUT COPIES OF AGENDA)  
06 BY MR. DAVID MULLINAX:  
07 Anybody else?  
08 (HANDING OUT COPIES OF AGENDA)

09 BY MR. DAVID MULLINAX:

10 Okay. Now that everybody has got a copy of the  
11 Agenda, I'd just like to remind you that we do go by  
12 the Agenda. If you have any questions or comments  
13 about the items that are being discussed, you can ask  
14 them at that time.

15 If you have anything that is not related to  
16 anything on the Agenda, I would ask that you hold that  
17 until the new business section of the meeting, and  
18 then we'll address those concerns at that time.

19 At this time, I'd like to turn it over to Mr.  
20 Wayne Bogan with the Army Corps of Engineers.

21 BY MR. BOGAN:

22 Well, welcome back. I hope everybody has had a  
23 good summer so far. I'll try and get my information  
24 to you as quickly as possible. If you have any  
25 questions, we'll go over those and see if there is

00004

01 anything that I can do to help you out.

02 I've handed you two pieces of information. One,  
03 your Status Sheet, and if anyone wants these items,  
04 there should be some up at the door, some extras; and  
05 I've also given you a copy of a map I want to give  
06 you. It's essentially the same as one of those.

07 Okay. It's just something I -- so that you would be  
08 able to have a bigger map to write on and to use as  
09 you see fit.

10 Okay. Two changes on the Status Sheets. Number  
11 one, on the earnings for this month, I just got those  
12 about an hour or two ago. I thought I had them on  
13 E-Mail, when I printed out this morning, they weren't,  
14 so I had to wait on a phone call.

15 The earnings for this month will be \$165,000.  
16 Earnings for this year total will be \$410,000.

17 That's what we've been billed for so far. Okay.  
18 As far as payment, we've only paid out \$310,000, and  
19 that's the cost data up through the 4th of August.  
20 So, sometime this week we should be getting the next  
21 set of cost data in for the past month after that.

22 A couple of things have happened since the last  
23 meeting, and I would like you to refer to page three  
24 of the Status Sheet. I'm going to skip over Item No.  
25 1 and go straight to Item No. 2, 00U1B.

00005

01 As you noticed in the last data sheet that I had  
02 Suzy send to you in the mail, 00U1B has been  
03 completed. They found a total of nine 60 millimeter  
04 mortars and two 81 millimeter mortar rounds. They  
05 were located and destroyed in place, and that area has  
06 been cleared as of the 6th of August.

07 The crews are now working in 00U7. They started  
08 there August 5th, and we've got all the crews working  
09 during that time.

10 The second change there is -- I stopped by the  
11 office today to get the update of how many mortar  
12 rounds they've found. I've got identified 29 60  
13 millimeter high explosive mortar rounds. As of today,  
14 you can add 11 more mortar rounds to that, so it will  
15 bring it up to 40. And I think they've run into the  
16 impact areas, so they're starting to get a lot more  
17 mortars.

18 And they've gone from three grenades we found in  
19 that area and found two more, another hand grenade and  
20 a rifle grenade.

21 In the area there's 112 out of 390 grids that

22 remain to be cleared.

23 I'm going to be providing, as soon as I can, a  
24 copy of this information to you. This is essentially  
25 a little chart that I'm getting from the contractor.

00006

01 Everything in white that you can see here, and I'll  
02 pass this around, are the areas that have already been  
03 cleared and it identifies on there what was found, if  
04 anything was found, say, like two 60 millimeters or  
05 one hand grenade. Okay.

06 The areas in brown or shaded are the ones that  
07 have not been cleared, yet. All right. And this is  
08 as of yesterday.

09 I'm also taking this information, and I've got  
10 somebody working on it right now, putting it on this  
11 map. What I'm going to is blow up then the area for  
12 OOU7 so that you'll have a good size 8 1/2" by 11"  
13 sheet that shows not only these grids, but it will  
14 show the roads, like the ranger station, the hilltop  
15 and that type of information so it will be easier for  
16 you to visualize, instead of just seeing this, exactly  
17 where each one of these grids are.

18 Most of the mortar rounds found to this point  
19 have been located on the side of the hilltop.

20 BY MR. GARY HENDERSON:

21 That's in O07?

22 BY MR. BOGAN:

23 Yes, Area 7. Okay. There were four rounds that  
24 were found next to the picnic area. You saw that in  
25 your last status report. There were three rounds

00007

01 that were found back toward the lake on past the horse  
02 stables next to the cemetery down there.

03 The other, that's what, four, seven rounds, so  
04 it went out to 40. The other 33 rounds have been  
05 found on the hilltop across the road from the ranger  
06 station more across from the picnic area and the swing  
07 sets, and that's where they expected they were going  
08 to be up on that hill

09 In Area 6, as you saw before, Headquarters is  
10 getting us a letter and our Division office passed us  
11 a letter also stating that we're not going to be able  
12 to buy back any of the property in OOU6, which  
13 includes Dr. Lowry's and some of the others.

14 All right. They indicated that it's not legally  
15 possible under CERCLA, which is the law that  
16 authorized certain funds, that ordnance does not fall  
17 under that law, which is what we fund to use to the  
18 buyback. Therefore, we have one option, which is to  
19 clean up the property.

20 In that respect, we have a contractor to do the  
21 site visits on August 28th, I believe it was, on Dr.  
22 Lowry's property, over towards Dr. Scott's property,  
23 look at those areas right quick.

24 They're going to come in starting in November to  
25 do some additional sampling. This will be in addition

00008

01 to the sampling that was done on Dr. Lowry's during  
02 the Engineering Evaluation and the work that was done  
03 on the Time Critical Removal Action. All right. And  
04 this to cover everybody that we have Right of Entries  
05 for, Dr. Lowry's plus the adjoining properties.

06 After they start on the sampling in November,  
07 they're going to take random samples to make sure we  
08 think we know exactly where the impact area is. We

09 have a very -- we have a good idea that it's on one  
10 hilltop right next to Dr. Lowry's land, but just to  
11 make sure that it's not right anywhere around, we'll  
12 sample those areas also.

13 They expect to be finished in March. We'll,  
14 again, have to set up another Action Memorandum  
15 requesting, again, approval of funds to clean up that  
16 area, and it will take us a little while, again, to  
17 get the funding and the contractor in place to start  
18 working on that property.

19 I'm trying to work so that we can do the  
20 sampling and potentially get HFA, who is doing the  
21 work right now within the State Park, just to move  
22 from wherever over to Dr. Lowry's and anybody else's  
23 properties contaminated there.

24 We may run into a problem, but they may say that  
25 we actually have an Action Memorandum signed before

00009

01 they'll let us do that. So we'll see how we can get  
02 that worked out.

03 All right. Any particular questions about 1B,  
04 Area 7 or 6?

05 Yes, sir.

06 BY MR. OSBORNE:

07 I've got quite a few of them. The item that was  
08 found during the press day that we had down there that  
09 they were concerned about, what was it when it was  
10 removed? We were supposed to be notified, and I never  
11 was notified.

12 BY MR. BOGAN:

13 Okay.

14 BY MR. OSBORNE:

15 Remember when all the eyebrows went up when they  
16 were ---

17 BY MR. BOGAN:

18 Uh-huh (affirmative response).

19 BY MR. OSBORNE:

20 --- with the magnetometer.

21 BY MR. BOGAN:

22 I'll -- I'll double check.

23 BY MR. THOMPSON:

24 Is that there where ---

25 BY MR. BOGAN:

00010

01 Sir?

02 BY MR. THOMPSON:

03 Is that where the ten of them were found down  
04 there?

05 BY MR. BOGAN:

06 No, sir.

07 BY MR. THOMPSON:

08 These grids?

09 BY MR. BOGAN:

10 That -- in reference to this sheet down here,  
11 there are a couple of grids in that area that have  
12 been cleared and a couple that have not. I'll have to  
13 check with the contractor and find out which one was  
14 and was not and see if they've actually -- actually  
15 cleared that area.

16 So far the grids that they cleared in that area,  
17 nothing has been found.

18 BY MR. OSBORNE:

19 All right. Their work hours is four days a  
20 week, right?

21 BY MR. BOGAN:

22 Yes, sir.  
23 BY MR. OSBORNE:  
24 12 hours a day?  
25 BY MR. BOGAN:

00011

01 No, 10 hours a day.  
02 BY MR. OSBORNE:  
03 10 hours a day?  
04 BY MR. BOGAN:  
05 Yes, sir.  
06 BY MR. OSBORNE:  
07 And what time do they start?  
08 BY MR. BOGAN:  
09 They were working from 6:00 to 4:00. They're  
10 now working from 7:00 to 5:30. They're shifting  
11 because of the change in daylight and the change in  
12 temperature.  
13 BY MR. OSBORNE:  
14 Then how come it is, when I go down there to  
15 check and see if they're coming back from work, that  
16 the whole place is all locked up and there's only a  
17 security guard there?  
18 BY MR. BOGAN:  
19 At what time?  
20 BY MR. OSBORNE:  
21 Are they leaving the site or do they come back  
22 there and then leave?  
23 BY MR. BOGAN:  
24 Are you talking about you checked at the trailer?  
25 BY MR. OSBORNE:

00012

01 Yeah.  
02 BY MR. BOGAN:  
03 And you're there during shutdown hours?  
04 BY MR. OSBORNE:  
05 Supposedly their shutdown hours and nobody shows  
06 up, and then there's only a security guard there and  
07 the gate is locked.  
08 BY MR. BOGAN:  
09 When I stopped there this afternoon, I stopped  
10 at 4:00, which is an hour and a half prior to their  
11 shutting down. The only person they had there was one  
12 of the safety guys in a truck with a radio, so that's  
13 way he's next to a phone in case of an emergency, and  
14 they had the secretary. Everybody else was out in the  
15 field, the Huntsville safety representatives and the  
16 contractor and crew.  
17 BY MR. OSBORNE:  
18 But do they come in there before they check out?  
19 BY MR. BOGAN:  
20 They ---  
21 BY MR. OSBORNE:  
22 Or do they check out from the field?  
23 BY MR. BOGAN:  
24 They check out through the radio from the field.  
25 BY MR. OSBORNE:

00013

01 All right. You were talking about Dr. Lowry's  
02 property. If the cost factor says that it's going to  
03 cost more to clean up than it is to buy it back, is  
04 that still going to be the ---  
05 BY MR. BOGAN:  
06 We'll still have to clean up, because there's no  
07 a legal option to buyback.  
08 BY MR. OSBORNE:

09 Okay. All right. On the areas that when the  
10 State went in there and was supposed to fence certain  
11 areas, and they haven't been fenced all this time,  
12 what are we going to do about that?

13 BY MR. BOGAN:

14 That's Area 2, 00U2, and that's scheduled for  
15 cleanup. That's on the second page of your Status  
16 Report. It has the status of when that's supposed to  
17 start.

18 If you look at "Initiate 00U2, 15 November  
19 1996," that area will be surface cleared at that  
20 point.

21 BY MR. OSBORNE:

22 What's going to be done about the State not  
23 fencing it all these years?

24 BY MR. BOGAN:

25 I don't know that we're going to take any action

00014

01 against them for not doing that.

02 BY MR. OSBORNE:

03 Now according to a report I got yesterday, DHEC  
04 met with EPA down there on certain things on land  
05 disposals and so forth, and as far as I understand,  
06 there was a member of the Park Department who was  
07 there. Do you know anything about it?

08 BY MR. BOGAN:

09 There was a meeting somewhere on the State Park.  
10 We have two members of the local community who have  
11 identified what they say are 28 potential hazardous  
12 waste sites or hazardous dump sites of some type.

13 They met with one of the park rangers and a  
14 member of DHEC. DHEC asked the two gentlemen to place  
15 every one of those sites on the map, and then they can  
16 come back and investigate every one of those sites.  
17 As of sometime today, they haven't given them the map,  
18 yet.

19 Okay.

20 BY MR. OSBORNE:

21 What -- what correlation do you have with the  
22 DHEC, and what is DHEC doing in the State level?

23 BY MR. BOGAN:

24 As far as the ordnance on this project?

25 BY MR. OSBORNE:

00015

01 Uh-huh (affirmative response).

02 BY MR. BOGAN:

03 We've coordinated with DHEC to make sure that we  
04 meet all the regulatory requirements, which there are  
05 very little for ordnance. The major requirement is  
06 that we move or transport any ammunition, then it has  
07 to be manifested on one of their hazardous waste forms  
08 manifest forms. Since all of the mortar rounds were  
09 blown in place, we don't have to meet that  
10 requirement.

11 As far as any of these potential sites and  
12 dump sites that we're going to find, DHEC will come in  
13 and look at those, and if there's something that is  
14 potentially related to a Former Camp Croft materials,  
15 then I can see if I can get any funding to clean up  
16 that area and we'll clean up the ordnance.

17 BY MR. OSBORNE:

18 Well, why I mentioned it, I -- after I found out  
19 about what had been going on, then I contacted Barney  
20 Harmon, head of DHEC here, and at that point, today,  
21 he told me that he didn't know anything about meetings

22 as of yesterday.  
23 BY MR. BOGAN:  
24 Uh-huh (affirmative response).  
25 BY MR. OSBORNE:

00016

01 And that at the present time there wasn't going  
02 to be any correlation with you guys. That you guys  
03 were going to handle it all.

04 BY MR. BOGAN:

05 Okay. We really can't do anything until these  
06 two gentlemen provide the map to us to show that  
07 information, and then I'll take and look at them, and  
08 I'll get with DHEC to make if there is anything that  
09 they'll look at.

10 BY MR. OSBORNE:

11 Now we're talking about the lead deposits, right?

12 BY MR. BOGAN:

13 Well, I don't know what they are. I -- well,  
14 actually I have. There's rumors that it was lead.  
15 That it's buried ammunition. That's it's radioactive  
16 materials and something else.

17 These are rumors that also one of these -- some  
18 other gentleman before brought up similar potential  
19 dump sites, but nobody has ever shown me where  
20 anything is.

21 BY MR. OSBORNE:

22 Yeah.

23 BY MR. BOGAN:

24 Until they can show me on the ground where it  
25 is, I really can't do much about it. And so, as soon

00017

01 as I get that information, I can check into it.

02 That is part of these programs to look at dumps.  
03 They're called HTRW: Hazardous, Toxic and  
04 Radiological Wastes.

05 BY MR. OSBORNE:

06 Now one of my other questions would be, as a  
07 Board member, if something of these things that are  
08 materializing in certain meetings, are we not denied  
09 -- are we denied access to go down and be a part of it  
10 or can we be?

11 BY MR. BOGAN:

12 I don't see why you couldn't be. I mean, I  
13 didn't know about it until -- when I got in the office  
14 Monday morning and they told me -- well, they wanted  
15 to see if I wanted to come up Monday. At that point  
16 it was too late, especially with me being on duty with  
17 the hurricane last week.

18 If you know about it and you wanted to meet with  
19 them as a representative of the community on the  
20 Board, I have no problem with it.

21 BY MR. THOMPSON:

22 Did you say you found out about it this week?

23 BY MR. BOGAN:

24 Uh-huh (affirmative response). Monday morning.

25 BY MR. THOMPSON:

00018

01 Why is this thing 50 years so late coming up?

02 BY MR. OSBORNE:

03 There's a lot of rumors that's starting to  
04 materialize, and ---

05 BY MR. THOMPSON:

06 That's what I'm afraid of.

07 BY MR. OSBORNE:

08 But the whole thing boils down to rumors are

09 usually 95 percent correct because there's a lot of  
10 stuff that supposedly has been moved in the last two  
11 to three months out of here, and I've contacted them  
12 on some of the rumors.

13 And then I talked to a State representative  
14 today that supposedly knows about the same rumors, and  
15 this is the first time I've talked to him about it, so  
16 we're trying to determine what's really going on.

17 BY MR. BOGAN:

18 If someone can provide me with information about  
19 where something is, then I can look. As I mentioned  
20 before in some of the earlier meetings, the majority  
21 of the information where I'll find ordnance sites or  
22 landfills or that type is where the local community  
23 tells me where it's located.

24 A good example is I was up in Clemson a week and  
25 a half ago and I found an old bombing range up there.

00019

01 We did have some rough estimation, but until I sat and  
02 talked to some of the people around there, I was able  
03 to pinpoint it.

04 Yes, as soon as they find it, then I can check  
05 into it.

06 BY MR. OSBORNE:

07 On tanks that you made mention of earlier in the  
08 cantonment area and that area, that you said, if we  
09 found out about any of it to be removed, to contact  
10 you. The ones I found out about hasn't been contacted  
11 yet. That's what they -- are they going to be  
12 contacted?

13 BY MR. BOGAN:

14 Can you give me the name of the landowner?

15 BY MR. OSBORNE:

16 Uh-huh (affirmative response).

17 BY MR. BOGAN:

18 Okay. Get that to me, and then I can try and  
19 get back up here.

20 BY MR. OSBORNE:

21 And then the other big rumor that come up within  
22 the last week is the tanks, either one or two that  
23 were buried under Blackman Mueller {phonetic  
24 spelling}. And, also, in the last month there's been  
25 a lot of additional wells that have been put along

00020

01 Croft Circle, and I was just sort of wondering what  
02 they were there for.

03 BY MR. BOGAN:

04 You'd have to contact -- contact the company  
05 that's putting them in. It's nothing that I know of  
06 that's been done. I'm not familiar with the area  
07 you're referring to as Blackman Mueller.

08 BY MR. OSBORNE:

09 Well, it's right off Croft Circle about where  
10 the Old Officers' Club was.

11 BY MR. THOMPSON:

12 Are these World War II tanks or are they ---

13 BY MR. OSBORNE:

14 Right, World War II tanks.

15 BY MR. THOMPSON:

16 World War II tanks.

17 BY MR. BOGAN:

18 Like armor tanks?

19 BY DR. KEITH:

20 Not -- not armor tanks.

21 BY MR. THOMPSON:

22 Yeah. I know what he's talking about, yeah,  
23 but ---

24 BY MR. BOGAN:

25 The tanks, are we talking about fuel tanks or

00021

01 are we talking about ---

02 BY MR. OSBORNE:

03 Fuel tanks.

04 BY DR. KEITH:

05 Fuel tanks.

06 BY MR. BOGAN:

07 I can go take a look at the tanks. That's not a  
08 problem. It would probably have to be the middle --  
09 the first of October, since that's the end of our  
10 fiscal year.

11 Any other questions on any of the work that  
12 we're doing so far?

13 BY MR. CONSTANTINE RAMANTANIN:

14 I've got a question.

15 BY MR. BOGAN:

16 Yes, sir.

17 BY MR. CONSTANTINE RAMANTANIN:

18 I'm Constantine Ramantanin, and I own some land  
19 down there.

20 BY MR. BOGAN:

21 Uh-huh (affirmative response).

22 BY MR. CONSTANTINE RAMANTANIN:

23 And if it weren't for my father, I would have no  
24 idea that there was a problem down there, and I grew  
25 up down there playing around down there, and I guess

00022

01 I'm lucky to live considering that I learned to shoot  
02 a gun down there and got into all kinds of things.

03 Who's running the show and how do I get on the  
04 mailing list and how do I figure out what the  
05 situation is with my land?

06 BY MR. BOGAN:

07 Okay. If you'll give your name and phone number  
08 and address to Ms. Suzy McKinney right there after  
09 this, then we can get you on the mailing list.

10 Okay.

11 BY MR. CONSTANTINE RAMANTANIN:

12 And how does this affect my land?

13 BY MR. BOGAN:

14 Well, what I have to do is look at -- and I've  
15 got some better maps that show potentially where your  
16 house is and your property, and if you can outline for  
17 me where your property is on the map, then I show you  
18 what we have potentially found near your property.

19 And if you have any questions from that, ---

20 BY MR. CONSTANTINE RAMANTANIN:

21 Well, I mean, am I an isolated case, or are  
22 there other people out there that own property that  
23 have no idea? Because I -- I live in New York, and,  
24 like I said, I'm just fortunate that I've got family  
25 here.

00023

01 BY MR. BOGAN:

02 Right.

03 BY MR. CONSTANTINE RAMANTANIN:

04 That's, you know, letting me know what the deal  
05 was, and, you know, I'm leaving this meeting to head  
06 right back to New York.

07 BY MR. BOGAN:

08 Right.

09 BY MR. RAMANTANIN:

10 I'm going directly from this meeting, and I  
11 stayed here just because I'd like to kind of know  
12 what's going on.

13 BY MR. BOGAN:

14 Sure.

15 BY MR. CONSTANTINE RAMANTANIN:

16 I'd like to one day to be able to build a house  
17 out there or something.

18 BY MR. BOGAN:

19 Sure. What we're doing on pieces of property  
20 where we've identified potential ordnance, potential  
21 mortar rounds or ammunition of any type, one of the  
22 things we're doing is sending in what we call Right of  
23 Entry requests to the landowners.

24 The landowners who haven't received one of those  
25 yet, more than likely, as a landowner, but we haven't

00024

01 identified anything on that property.

02 I know that we've -- we've got the work we're  
03 doing now for the cleanup. We've also got 88  
04 additional sites we're looking at doing starting  
05 November, and our real estate office is going to be  
06 sending out Right of Entry requests to every one of  
07 those entry sites.

08 So -- but I'll look at your property and see on  
09 the map, we can look at it and adjust and try and  
10 determine if there is any information of wastes right  
11 next to your property.

12 There also is here in the library we set up a  
13 repository for information that we've gotten in, and  
14 I'll be glad to give you anything that I've got that I  
15 know.

16 Yes, sir.

17 BY MR. ALEXANDER RAMANTANIN:

18 I'm Alexander Ramantanin. A lady that lives on  
19 my property said that some men in uniforms went down  
20 there and exploded some shells down there or whatever  
21 it was. They told her that it was all clear down  
22 there. So, I mean, is it or isn't it?

23 BY MR. BOGAN:

24 I don't know what units came in and blew up  
25 rounds on her property. Okay. Any of the work that

00025

01 we do is right through our contractor. So, say, for  
02 instance, you know, units out of Fort Jackson, which  
03 is the 48 Explosive Ordnance Disposal Unit, comes in  
04 and removes something and they respond to on a piece  
05 by piece basis, then they don't give us reports of  
06 what they've done, and a lot of times they don't  
07 reports but every three years.

08 I can check to see if something was done  
09 recently, but if it was done over three years ago,  
10 they won't even have copies of the reports of what  
11 they have done.

12 BY MR. THOMPSON:

13 Alex, when was that done?

14 BY MR. ALEXANDER RAMANTANIN:

15 Last three or four months, something like that?

16 BY MR. THOMPSON:

17 Okay. It's not the group that came in there and  
18 said they found some on Henningston Road and exploded  
19 them down there and then had the meeting out here that  
20 night. What was that company?

21 BY MR. ROBERT MCBAIN:

22 No, it was not that group. I can answer that  
23 question.

24 BY MR. THOMPSON:

25 It wasn't that group?

00026

01 BY MR. ROBERT MCBAIN:

02 It's not associated with that group.

03 BY MR. BOGAN:

04 I can check.

05 BY MR. ROBERT MCBAIN:

06 But you raise an interesting question. Who is  
07 this uniform outfit that comes in and moves stuff out  
08 in the middle of the night with Sheriff's cars along  
09 with them, as long as you're into that subject?

10 BY MR. BOGAN:

11 Okay. I'll answer this, and, hopefully, Mr.  
12 Ramantanin, this will help answer your question.

13 If a citizen in a local community finds  
14 something, I've requested that they call 911 or call  
15 the Sheriff's office. The Sheriff's office takes a  
16 look at it. If it's something beyond what they can  
17 handle, if it is a mortar round or an explosive of  
18 some type, they will either call SLED, the State Law  
19 Enforcement Division, or they will call the 48th EOD,  
20 Explosive Ordnance Disposal Unit, out at Fort Jackson.

21 Either SLED or the 48th EOD will come in and  
22 destroy any rounds that they find. And when they tell  
23 you that's it all clear, they're usually referring to  
24 what they have found in that immediate area. That  
25 doesn't mean that a quarter of a mile down the road

00027

01 that there's nothing else down there.

02 BY MR. ALEXANDER RAMANTANIN:

03 Well, I think it went through the proper  
04 channels. I was told they something there. They told  
05 who to call at the Sheriff's Department, which I did.

06 BY MR. BOGAN:

07 Yes, sir.

08 BY MR. ALEXANDER RAMANTANIN:

09 Which he came out and talked with me about it,  
10 and the next thing I know I -- he talked with the lady  
11 down there and told her that I had given them  
12 permission to go in there. I think they did  
13 everything, according to her.

14 BY MR. BOGAN:

15 Yes, sir. I'll check with the 48th EOD and see  
16 if they've been in that area and see if I can get  
17 copies of their reports and try and look at it and  
18 make sure it's on the map and see if it's something  
19 new that we haven't found.

20 BY MR. ALEXANDER RAMANTANIN:

21 If -- if it's all clear -- all my property I'm  
22 talking about. If it's all clear, I have a dream. I  
23 have a dream to do big things down there, but my dream  
24 has kind of turned out to be a nightmare now.

25 I don't know whether to proceed or what. I've

00028

01 -- I put in a water line down there. Now they're  
02 talking about wanting me to put in a sewer line, and  
03 I've gotten landscape architects to work on it and  
04 everything. I had great plans for things down there,  
05 but I'd like to know for sure which way to go.

06 BY MR. BOGAN:

07 All right, sir. If I remember correctly, our  
08 real estate office did send a copy of a Right of Entry

09 to you, and I'll -- I thought they had, and I'll  
10 double check my records.

11 Okay. If not, if you can look at with me on the  
12 map to make sure that we're not missing your property,  
13 if there's something that we're supposed to be looking  
14 at, because I remember the day that, I think, we had  
15 your name on the list as potentially sending out a  
16 Right of Entry request to you.

17 And if they sent you one, then that means that  
18 come November, when we do the additional sampling,  
19 that that's when we'll start coming in during that  
20 November through April time frame to sample any of  
21 those properties, which, I think, your's is included.  
22 After they sample those properties, if they just  
23 -- if they look at it and say, "Well, we don't think  
24 anything is there. The only thing we're picking up  
25 are nails and barbwire," then they'll write a

00029

01 statement as such, and then get back with you and say,  
02 "All we found at this point indicates there's nothing  
03 on your property."

04 If they find there is something there that we  
05 need to clean up, then, as we've done with the State  
06 Park and the others, we'll come in and include your  
07 property and everybody else's property that might have  
08 something else on it in a removal action where we'll  
09 come in and clean up any of the ordnance that's been  
10 identified on your property.

11 BY MR. ALEXANDER RAMANTANIN:

12 All right.

13 BY MR. BOGAN:

14 Okay. Now if you have any questions, you know,  
15 I'll give you one of my business cards and you can  
16 give me a call at any point.

17 BY MR. ALEXANDER RAMANTANIN:

18 Uh-huh (affirmative response).

19 BY MR. BOGAN:

20 And if you don't want to place a long distance  
21 call, just ask me to call you back and I'll do that to  
22 save you a call.

23 BY MR. ALEXANDER RAMANTANIN:

24 Okay. Thank you.

25 BY MR. BOGAN:

00030

01 Yes, sir.

02 BY MR. OSBORNE:

03 I have a question. Isn't the Corps of Engineers  
04 and the Army at Fort Jackson the same army?

05 BY MR. BOGAN:

06 Yes, sir.

07 BY MR. OSBORNE:

08 The United States? And you can't coordinate and  
09 get reports from them on what they're doing?

10 BY MR. BOGAN:

11 Yes, sir. But how many people are in the United  
12 States Army, sir?

13 BY MR. OSBORNE:

14 I'm not talking about that. I'm talking about  
15 the unit at Fort Jackson. Can't they report to you  
16 guys of what's going on in certain areas of the State?

17 BY MR. BOGAN:

18 I'll talk with Fort Jackson just to make sure if  
19 this is an instance where they've come up and haven't  
20 given me that information, then I can make sure they  
21 can give it to us.

22 There is no formal chain from the 48th EOD to  
23 me. They go up through their chain up through the  
24 Force Com to the Pentagon, then it will come back  
25 down. So, I'll try and bypass any of that up the

00031

01 ladder, back down the ladder and see if there is any  
02 information.

03 BY MR. OSBORNE:

04 The other thing I find rather interesting, I  
05 purchased a 200 channel ultra band with 800 megahertz  
06 and so forth, and the stuff that's coming out on it,  
07 especially on the military frequency, as to what's  
08 happening around here. It gets sort of interesting.

09 Now at this point, is this something that should  
10 be reported to you guys when I hear it or just forget  
11 it?

12 BY MR. BOGAN:

13 Well, if you think that it's something illegal  
14 or something that might affect the work that we're  
15 doing here in Croft, please let me know, and I'll try  
16 and check it out, just as with one rumor that you had  
17 called me and Gary Henderson called me about where we  
18 checked on it.

19 And I'll mention this. There was a rumor that  
20 Friday night or Saturday morning, excuse me, at 2:00  
21 a.m. I think it was between 2:00 a.m. and 5:00 a.m.,  
22 something like that, several Army -- what they called  
23 duce and halves, two and a half ton trucks, and these  
24 new jeeps of the Army, several Army majors, FBI and  
25 SLED were all on site removing something; and Mr.

00032

01 Osborne called me and I checked into it, and the 48th  
02 EOD out of Fort Jackson said they had never seen  
03 anybody down here to do anything as such.

04 The FBI and the names I've given had said we  
05 don't have anybody with that name within the State of  
06 South Carolina who does any of that work.

07 So, if you'll get that information to me, I'll  
08 check up on it; and if it's true, then I'll get that  
09 back to you. If it's not, I'll get that back to you,  
10 also.

11 BY MR. ROBERT MCBAIN:

12 Do you have any way of checking into Tennessee,  
13 the subject unit that's moving to Tennessee and  
14 Virginia? Does your area of interest extend that far?

15 BY MR. BOGAN:

16 We have an office in Nashville, in the Nashville  
17 District.

18 BY MR. ROBERT MCBAIN:

19 Okay. What about eastern Tennessee?

20 BY MR. BOGAN:

21 My office only covers the State of South  
22 Carolina.

23 BY MR. ROBERT MCBAIN:

24 The State of South Carolina.

25 BY MR. BOGAN:

00033

01 But I can -- I can get the office phone numbers  
02 for any others you need.

03 Any other questions on our work that we've done  
04 up to this point?

05 (NO RESPONSE)

06 BY MR. BOGAN:

07 We're looking at coming in this ---

08 BY MR. GEORGE MULLINAX:

09 There's a question.

10 BY MR. BOGAN:

11 Yes, ma'am.

12 BY MS. ELIZABETH O'CONNOR

13 I've got a question about Southside Park. I'm  
14 with the Spartanburg Freewheeler Bicycle Club, and we  
15 would like an update on the status there.

16 I was under the impression that everything south  
17 of the river had already been cleared, and now I'm  
18 hearing information that that's not necessarily the  
19 case, and we've got a lot of members that go out there  
20 and use that area.

21 BY MR. BOGAN:

22 Okay. You'll have to describe to me where in  
23 Southside Park you're referring to.

24 BY MS. ELIZABETH O'CONNOR:

25 It's -- it's the portion of the Park with the

00034

01 old landfill in it.

02 BY MR. BOGAN:

03 Okay. There were two areas near there that have  
04 been listed, I believe, it's the low priority and  
05 maybe medium priority to do some additional work on  
06 it. And afterwards, if you'll look at this map ---

07 BY MS. ELIZABETH O'CONNOR:

08 Okay.

09 BY MR. BOGAN:

10 Okay. It identifies on there whether they're  
11 either A5, A6 or A7.

12 Come November when our contract comes in,  
13 they're to come in and scan those areas for any  
14 potential ordnance contamination.

15 BY MS. ELIZABETH O'CONNOR:

16 Uh-huh (affirmative response).

17 BY MR. BOGAN:

18 If there is anything, we'll say, we'll clean  
19 that up. If there's not, then we'll say that no  
20 further action is recommended in that area.

21 BY MS. ELIZABETH O'CONNOR:

22 Okay. Thank you.

23 BY MR. BOGAN:

24 We're driving along with the cleanup in Area 7.  
25 Right now they're moving a little bit faster than the

00035

01 scheduled completion times. They are slowing down a  
02 little bit because of the ordnance that they're  
03 finding in the impact area at the moment.

04 For example, they found six mortar rounds  
05 yesterday, 11 mortar rounds today, so that does slow  
06 them down.

07 They were cleaning approximately 40 grids per  
08 week up until this point, which would have gotten them  
09 -- if they didn't run into any heavy contamination,  
10 they would have been finished by the last week of  
11 September or the first week of November -- excuse me,  
12 October.

13 So, hopefully, we'll finish a week or two ahead  
14 of the schedule and go on to Area A39 and OOU2.

15 ESE, Environmental Science and Engineering, is  
16 going to be here in November to start doing their  
17 sampling. They have projects engineering that's going  
18 to be doing sampling on OOU6 and expect -- after we  
19 finish doing the next EE/CA with ESE, unless someone  
20 comes up and tells us an additional area, we really  
21 won't don't know of anything else, and we'll take that

22 to removal, and then we'll stop at that point.

23 Yes, sir, and your name, please, sir.

24 BY MR. CHARLES PHILLIPS:

25 Buddy, I can show you where I've buried some

00036

01 ammunition out there.

02 BY MR. BOGAN:

03 Okay.

04 BY MR. CHARLES PHILLIPS:

05 Anytime you find time to go with me over there.

06 BY MR. BOGAN:

07 All right, sir. If you'll let me get your name  
08 and phone number after the meeting, and then I'll  
09 contact you after the meeting.

10 BY MR. CHARLES PHILLIPS:

11 I talked to -- one of them called me. I talked  
12 to one of the rangers out there.

13 BY MR. BOGAN:

14 Yes, sir.

15 BY MR. CHARLES PHILLIPS:

16 And one of the engineers called me and talked to  
17 me right before Easter, and he was supposed to call me  
18 back and never has.

19 BY MR. BOGAN:

20 All right, sir.

21 BY MR. CHARLES PHILLIPS:

22 And I was one of the last troops to come through  
23 here.

24 BY MR. BOGAN:

25 Okay. I'll get with you and get you to show me

00037

01 where you buried that ammunition. That will be a  
02 great help. I appreciate it.

03 Any other questions about what we're doing at  
04 this point?

05 BY MR. SANFORD SMITH:

06 All these rounds we found, Wayne, are they alive  
07 or dead?

08 BY MR. BOGAN:

09 Alive, sir.

10 BY MR. THOMPSON:

11 How deep are they?

12 BY MR. BOGAN:

13 All the rounds found in 00U1B, of course, it was  
14 a surface clearance, and those were all found on the  
15 surface. There were nine 60s and two 81 millimeters.

16 The rounds so far in 00U7, the deepest has been  
17 14 inches, and the closest to the surface has been two  
18 inches. It looks like the average right now is about  
19 five to six inches, and I have this here if anybody  
20 wants to look at this. It lists the depth of each one  
21 of those.

22 BY MR. CONSTANTINE RAMANTANIN:

23 And how -- how deep are they going? I mean, how  
24 do we know what's down there?

25 BY MR. BOGAN:

00038

01 Through the sampling we've done up to this  
02 point, because of the soil in this area being as dense  
03 as it is with the clay and the rock from the mortars,  
04 which are a little bit lighter than the normal  
05 artillery, most everything that we've found has been  
06 22 inches -- between zero and 22 inches from the  
07 surface. Only one or two -- few cases have found  
08 anything deeper than that. All right.

09 If you've got something that's construction  
10 buried over some of the materials, we might find  
11 something deeper than that, but anything should be  
12 found within the two foot of the surface.

13 BY MR. ROBERT MCBAIN:

14 How deep are you prepared to go with your  
15 organization?

16 BY MR. BOGAN:

17 Just as we've done in Area 7, which is the  
18 ranger's station and the recreation areas within the  
19 State Park, if the sampling tells that we should not  
20 find anything deeper than two foot, then we'll set a  
21 contract up and go down to two foot.

22 BY MR. ROBERT MCBAIN:

23 Well, how deep does your equipment go?

24 BY MR. BOGAN:

25 I don't know all of the specifications on the

00039

01 equipment, but I think some of them we have go down to  
02 six foot with the 60 millimeter mortars.

03 BY MR. ROBERT MCBAIN:

04 But you don't have any that can go deeper than  
05 that?

06 BY MR. BOGAN:

07 No, sir.

08 BY MR. ROBERT MCBAIN:

09 Do you have access to satellite scanning?

10 BY MR. BOGAN:

11 Yes, sir. We've actually used some -- a little  
12 bit of satellite imagery on the site. We've also used  
13 something through JPL, Jet Proportions Laboratory,  
14 where they did the fly over the site trying to use a  
15 special type of radar image, but because of the high  
16 clay and water content in the soils, we weren't able  
17 to get any data.

18 Now that same equipment used out in a desert can  
19 pick up chicken wire, they said, down to two feet in  
20 the soil. But here, they couldn't pick anything out  
21 of the soil because of the rocks and water.

22 BY MR. ROBERT MCBAIN:

23 Have you had any contact with Phillips Petroleum  
24 and some of the other places?

25 BY MR. BOGAN:

00040

01 No, sir.

02 BY MR. ROBERT MCBAIN:

03 Back to my question, how deep are you people  
04 prepared to go? Do you have any indication of going  
05 anything other than six feet?

06 BY MR. BOGAN:

07 No, sir. All the mortar rounds, based on  
08 experience from this site and others, we shouldn't be  
09 finding the rounds any deeper than four foot, and in  
10 this site the only thing we're finding are within two  
11 feet.

12 If we find an area where the rounds are going  
13 deeper, for example, on Dr. Lowry's property where we  
14 have the 105 millimeter rounds instead of just the  
15 mortars, those rounds have a tendency to go deeper,  
16 and in that case, we will go deeper.

17 Any other questions?

18 BY MR. SANFORD SMITH:

19 Wayne, any estimate on the -- maybe Shannon can  
20 answer this. Any estimate on when parts of the Park  
21 will reopen?

22 BY MR. BOGAN:

23 I'll have to double check with the Parks office  
24 in Columbia, but I would assume that once we give them  
25 clearance notification saying that 00U7 has been

00041

01 cleared down to the two foot depth and that it's safe  
02 for the public to go back into, I would expect them to  
03 come in shortly thereafter and open back up that area  
04 of the park.

05 BY MR. SANFORD SMITH:

06 Have you got an educated guess when that will  
07 be?

08 BY MR. BOGAN:

09 I'm hoping, sir, that when we clean 00U7 about  
10 the 23rd of October, that it's sometime around that  
11 time frame.

12 BY MR. SANFORD SMITH:

13 Oh, okay.

14 BY MR. BOGAN:

15 One of the things that that's going to do when  
16 we open up Area 7, that covers the two campgrounds,  
17 the horse ring, the fitness trail, and there's also  
18 the trail head next to the trails -- the horse trails,  
19 that is, the biking trails -- therefore, all the  
20 biking trails, with the exception of the two up to the  
21 northern part next to Henningston Road, that should  
22 open those trails back up, also. So, that would open  
23 up probably, what, 80 percent of the Park again.

24 BY MR. GARY HENDERSON:

25 Wayne, I see you're clearing Area 7 down to two

00042

01 feet.

02 BY MR. BOGAN:

03 It's down to two foot. If they find anything  
04 deeper, they go -- they have the authorization to go  
05 down to four foot.

06 BY MR. GARY HENDERSON:

07 So you're discounting the EOD regulation or  
08 their -- their regulation on the four feet?

09 BY MR. BOGAN:

10 No, sir. The EOD regulation is a standard that  
11 is set aside and it says down in the construction area  
12 for a recreational area, like we have in the State  
13 Park, go down to four foot.

14 BY MR. GARY HENDERSON:

15 Uh-huh (affirmative response).

16 BY MR. BOGAN:

17 However, the regulation, whether it's  
18 specifically in that one or another one, will make it  
19 two, and it states that if we have evidence showing  
20 that the rounds are shallower or don't all go down to  
21 four foot, then we can recommend through an  
22 engineering study to go at a shorter depth. In which  
23 case, we recommended two foot in the Engineering  
24 Evaluation.

25 Actually, they recommended -- they found rounds

00043

01 down to 22 inches, and they recommended two foot,  
02 which is two inches down, just to make it an even  
03 number. We went ahead and set it up so that they go  
04 down to four foot, if they found something that's  
05 deeper at four foot.

06 BY MR. CONSTANTINE RAMANTANIN:

07 And if they found something deeper than that  
08 four feet?

09 BY MR. BOGAN:

10 That would be a call of the safety guy. If they  
11 dig down to four foot and they still get a strong  
12 signature from the magnetometer with a reason to  
13 believe that there is a mortar round there or an  
14 artillery shell of some type, and in the Park we deal  
15 with mostly mortar rounds, then that's up to the  
16 safety guy. If he believes that it's endangering the  
17 public, he can make the authorization to change the  
18 contract and go down deeper.

19 BY MR. CONSTANTINE RAMANTANIN:

20 What about on private land?

21 BY MR. BOGAN:

22 Any of the land where we come in and we  
23 recommend two foot or four foot, our guys -- it  
24 doesn't matter whether it's on State or private land.  
25 It's a mortar round and our job to get rid of it.

00044

01 BY MR. CONSTANTINE RAMANTANIN:

02 And is there any conceivable forecast as to how  
03 long this entire project may take?

04 BY MR. BOGAN:

05 The original estimate was the year 2001 to go  
06 through everything. We probably expect that, after we  
07 do the Engineering Evaluation which starts in  
08 November, then the final report is due in April of  
09 '97. To get a contract in place and to get that  
10 contractor removing ordnance like it is now, it  
11 probably will take another year and a half to two  
12 years.

13 They're -- you count from April of '97, then I'm  
14 hoping no later than the summer of '99 to have  
15 everything finished. That's two years earlier than  
16 originally said.

17 BY MR. OSBORNE:

18 I have a question. That magnetometer will go  
19 down to four feet?

20 BY MR. BOGAN:

21 Depending on which one you go. They're set --  
22 and the quality of the magnetometer you're using.  
23 Some will go down to two feet and some are set to go  
24 down probably set at six feet, and I don't have the  
25 specifications in front of me to tell you exactly

00045

01 which one goes which.

02 BY MR. OSBORNE:

03 But we're just setting them and only going four  
04 feet or four -- or only two feet?

05 BY MR. BOGAN:

06 They're setting the standards within the State  
07 Park. They're using the magnetometers and calibrating  
08 it down to four foot for a 75 millimeter round.

09 BY MR. HAYES:

10 Wayne, on that second EE/CA, have they set a  
11 date when start sampling some of the areas outside of  
12 the Park boundaries?

13 BY MR. BOGAN:

14 The second EE/CA deals primarily with the areas  
15 outside of the State Park boundary. There are a few  
16 that are within the boundaries of the State Park.

17 The areas, specifically around residences, the  
18 area here off to the side, has been our number -- on  
19 that site -- number one priority because that's the  
20 closest to the public, and we're looking to starting  
21 doing those areas around November, the 15th of

22 November.  
23 BY MR. HAYES:  
24 But has money been approved for the second  
25 EE/CA?

00046

01 BY MR. BOGAN:  
02 The money is already in place for the second  
03 EE/CA, yes.  
04 BY MR. HAYES:  
05 Okay.  
06 BY MR. BOGAN:  
07 They're negotiating the contract right now.  
08 BY MR. ROBERT MCBAIN:  
09 That strikes particular, Wayne. We hear rumors  
10 at one time the Corps have detailed maps of where  
11 everything, including the bombs that are six big and  
12 maybe as many as 60 small were located. Those -- we  
13 also hear rumors that those maps were stolen from the  
14 alphabet boys out there on Dairy Ridge Road. Do you  
15 have any comment on that?  
16 BY MR. BOGAN:  
17 Yes, sir. This issue has come up several times  
18 before. We've had problems getting some maps. This  
19 map, plus the ones that you'll find in the Public  
20 Library, detail just about everything that we have,  
21 and you'll have some historical maps that are in  
22 there.  
23 There were some maps stolen from one of our  
24 contract trailers early on. However, they were maps  
25 just like this and re-created on current data, and

00047

01 that's when the guys were doing some of their  
02 clearance work.  
03 BY MR. ROBERT MCBAIN:  
04 Do you and your files have copies of any of the  
05 material that has subsequently disappeared from the  
06 National Archives dealing particularly with Camp Croft  
07 and two other sites which are out of your area of  
08 jurisdiction.  
09 Do you have any -- there was a contract  
10 researcher in the National Archives, and in the  
11 meantime the -- following the move of one building  
12 down to the new building, some of the Camp Croft  
13 material disappeared.  
14 Do you people have -- and this contract  
15 researcher was under contract with the Corps of  
16 Engineers of Charleston. I have personally verified  
17 that.  
18 Do you have any of those maps in your possession  
19 in Charleston?  
20 BY MR. BOGAN:  
21 All right, sir. Do you know the time frame when  
22 that contract person was doing this?  
23 BY MR. ROBERT MCBAIN:  
24 Six months. Within the last six months.  
25 BY MR. BOGAN:

00048

01 Yes, sir. And the Corps of Engineers of  
02 Charleston does not hire a contractor of any sort to  
03 any work in the National Archives for this particular  
04 project. Any contractors hired up to this point have  
05 been out of Huntsville.  
06 Now, it's possible she may have been hired by  
07 Huntsville to do work for Charleston. Okay.  
08 BY MR. ROBERT MCBAIN:

09 Well, carrying Huntsville comes much farther  
10 then. Were you part of this meeting when the people  
11 from Huntsville that were in here yesterday?

12 BY MR. BOGAN:

13 The one with DHEC and the two residents?

14 BY MR. ROBERT MCBAIN:

15 No, I'm talking about the other group from  
16 Huntsville that came in quiet and left quiet. The  
17 same people that are on the Internet looking to buy  
18 property within the cantonment area. Is that any part  
19 of your organization?

20 BY MR. BOGAN:

21 No, none that I know of, sir.

22 We have a list of the projects related to Camp  
23 Croft, which are a part of the Supplemental Archives  
24 Search Report in the library. Now whether some of  
25 those are missing or not, I'll have to look and try

00049

01 and see if there is anything that might be missing  
02 over the years, and I don't know of any reports or  
03 anything disappearing within the last couple of  
04 months; and actually, it hasn't been about six months.

05 The Supplemental Archives Search Report was  
06 completed in January, I believe. December or January.  
07 It's now September. All the research done for that  
08 report was done -- completed essentially three months  
09 prior to that. It was almost a year ago now.

10 BY MR. ROBERT MCBAIN:

11 Well, that could have been within the time frame  
12 then. This person told me personally that they were  
13 hired by the Corps of Engineers in Charleston. They  
14 did not mention Huntsville, but they got very upset  
15 when I mentioned the fact that I was familiar with the  
16 Camp Croft area and ceased to talk at that point in  
17 time. They specifically said Corps of Engineers in  
18 Charleston.

19 BY MR. BOGAN:

20 All right, sir. I can give you the name of our  
21 contracting office, the chief of our contracting  
22 office and you can call her directly to verify whether  
23 or not that person did ever work under a contract with  
24 the Corps of Engineers out of Charleston.

25 BY MR. ROBERT MCBAIN:

00050

01 Okay.

02 BY MR. LITTLEJOHN:

03 What was the name of this person and who did she  
04 allegedly work for?

05 BY MR. ROBERT MCBAIN:

06 That is part of the files that are still in  
07 Washington.

08 BY MR. LITTLEJOHN:

09 You didn't get this person's name when you  
10 talked with her?

11 BY MR. ROBERT MCBAIN:

12 I got it at the time, but I left it with the  
13 people in Washington.

14 BY MR. DAVID MULLINAX:

15 Could I have the address of that web site where  
16 they trying to get it from.

17 BY MR. ROBERT MCBAIN:

18 Yeah, they're strange. They're coming out of  
19 Sao Paulo, Brazil. They're coming out of Stuttgart,  
20 Germany. They're coming out of ---

21 BY MR. DAVID MULLINAX:

22 That's -- that's -- I understand that, but can I  
23 get the address where these solicitations are coming  
24 from on the web? Could we get that ---  
25 BY MR. THOMPSON:

00051

01 Do you have the web address?  
02 BY MR. ROBERT MCBAIN:  
03 They don't leave any.  
04 BY MR. DAVID MULLINAX:  
05 Well, they do. There's always a return path.  
06 BY MR. ROBERT MCBAIN:  
07 They -- they don't list anything. It's all been  
08 questions, no answers.  
09 BY MR. DAVID MULLINAX:  
10 Can you ---  
11 BY MR. ROBERT MCBAIN:  
12 We sent E-Mail out and tried it and don't get  
13 anything. They don't answer.  
14 BY MR. LITTLEJOHN:  
15 I don't understand. If they're trying to buy  
16 property in the old cantonment area and they're not  
17 giving an address, what's the purpose? How can ---  
18 BY MR. ROBERT MCBAIN:  
19 They called in and asked for the real estate  
20 people who are handling this particular property.  
21 BY MR. LITTLEJOHN:  
22 Well, there has to be some type of contact point  
23 that these people are using.  
24 BY MR. ROBERT MCBAIN:  
25 It came and went too fast for the people to have

00052

01 seen it.  
02 BY MR. DAVID MULLINAX:  
03 But there's a record. There's -- there's --  
04 there's addresses. There's replies to E-Mail. I  
05 mean, it's a touch of a button. I know. I do it  
06 every day, so, I mean, tell me who has told you, and I  
07 will get in touch with them or was it you personally.  
08 BY MR. THOMPSON:  
09 We should know that.  
10 BY MR. DAVID MULLINAX:  
11 Because, I mean, I can look at your computer,  
12 and I'll get the address myself.  
13 BY MR. ROBERT MCBAIN:  
14 I don't have a computer.  
15 BY MR. DAVID MULLINAX:  
16 Well, then, give me the name of the person that  
17 this is coming from.  
18 BY MR. ROBERT MCBAIN:  
19 You give me your name and I'll have them contact  
20 you.  
21 BY MR. DAVID MULLINAX:  
22 Very well.  
23 BY MR. ROBERT MCBAIN:  
24 I don't know if they can give the foreign  
25 contacts listed or not. They came and went,

00053

01 apparently, so fast, and this is from my understanding  
02 -- I'm sure you experts will tell me I'm wrong, but my  
03 understanding was that their scanning went so fast and  
04 they did not leave any answers, but they're looking  
05 for a Sergeant Moore and a Sergeant Jones, and they're  
06 looking for a time to dig and they are theoretically  
07 bringing people in from Holland to do it.  
08 BY MR. LITTLEJOHN:

09 Any ---  
10 BY MR. ROBERT MCBAIN:  
11 If that's any interest to you, why, there it  
12 is.  
13 BY MR. LITTLEJOHN:  
14 Any information you're sharing with us is second  
15 hand. You don't have first hand knowledge of any of  
16 this?  
17 BY MR. ROBERT MCBAIN:  
18 No.  
19 BY MR. LITTLEJOHN:  
20 So it would be strictly rumor on your part?  
21 BY MR. ROBERT MCBAIN:  
22 That's right. I qualified it before I started.  
23 BY MR. LITTLEJOHN:  
24 I just wanted to make sure. I missed that part.  
25 BY MR. ROBERT MCBAIN:

00054

01 That's why I was asking the questions to find  
02 out if anybody else had had any information.  
03 BY MR. BOGAN:  
04 Any other questions?  
05 (NO RESPONSE)  
06 BY MR. BOGAN:  
07 David. Thank you.  
08 BY MR. DAVID MULLINAX:  
09 Okay. We'll move on to the new business section  
10 on the Agenda. I'll ask the Board at first if they  
11 have any new business that they would like to present?  
12 (NO RESPONSE)  
13 BY MR. DAVID MULLINAX:  
14 And I see none.  
15 BY MR. GEORGE MULLINAX:  
16 David, I've got this letter from Representative  
17 Inglis about the death of Mr. Moore and Mr. Jackson.  
18 This has been turned over to the Congressional Inquiry  
19 Division, and they have given it a case number. I  
20 have the case number, so they are reviewing it, and  
21 they're going to come up -- if there's any regulation  
22 or anything they can help this family with, so it has  
23 been turned over to the Pentagon, and they've given it  
24 a case number, so they are working on it.  
25 BY MS. JOHNSON:

00055

01 It's not Jackson. It's Johnson.  
02 BY MR. JOHNSON:  
03 It's Johnson, but we thank you for everything  
04 you've done. We thank you very much.  
05 BY MR. OSBORNE:  
06 Now that summer is over, we're going to have the  
07 meetings once a month?  
08 BY MR. DAVID MULLINAX:  
09 That was my next question after I -- we'll  
10 address that here in just a second.  
11 Is there any new business from the audience?  
12 (NO RESPONSE)  
13 BY MR. DAVID MULLINAX:  
14 If not, I'll ask Suzy, when is the next meeting  
15 scheduled?  
16 BY MS. MCKINNEY:  
17 Well, we've got it scheduled for December, three  
18 more months, unless the Board would like to meet ---  
19 BY MR. THOMPSON:  
20 Don't the By-Laws say every three months?  
21 BY MS. MCKINNEY:

22 Quarterly.  
 23 BY MR. DAVID MULLINAX:  
 24 It does say every three months.  
 25 BY MR. THOMPSON:

00056

01 Right.  
 02 BY MR. LITTLEJOHN:  
 03 That's correct.  
 04 BY MS. MCKINNEY:  
 05 Unless the Board would like to meet more  
 06 frequently.  
 07 BY MR. LITTLEJOHN:  
 08 No.  
 09 BY MS. MCKINNEY:  
 10 And that's your option.  
 11 BY MR. DAVID MULLINAX:  
 12 Then the December time is when, Suzy.  
 13 BY MS. MCKINNEY:  
 14 December 10th.  
 15 BY MR. DAVID MULLINAX:  
 16 Any other questions or comments?  
 17 (NO RESPONSE)  
 18 BY MR. DAVID MULLINAX:  
 19 Suzy, do you have anything?  
 20 BY MS. MCKINNEY:  
 21 No.  
 22 BY MR. LITTLEJOHN:  
 23 Make a motion we adjourn.  
 24 BY MR. DAVID MULLINAX:  
 25 Second? Do I have a second?

00057

01 BY MR. OSBORNE:  
 02 I second it.  
 03 BY MR. SANFORD SMITH:  
 04 Second.  
 05 (MEETING CONCLUDED AT 7:50 P.M.)

05 This is to certify that the within meeting was  
 06 taken on the 10th day of September, 1996;  
 07 That the foregoing is an accurate transcript of  
 08 the meeting;  
 09 That copies of all exhibits, if any, entered  
 10 herein are made a part of this record;  
 11 That the undersigned court reporter, a Notary  
 12 Public for the State of South Carolina, is not an  
 13 employee or relative of any of the parties, counsel or  
 14 witness and is in no manner interested in the outcome  
 15 of this action.  
 16 IN WITNESS WHEREOF, I have hereunto set my Hand  
 17 and Seal at Spartanburg, South Carolina, this 26th day  
 18 of September, 1996.
