RE: Former Camp Croft Restoration Advisory Board Support
Revised Final Community Relations Plan
Contract No.: W912DY-04-D-0007, Task Order 0007

Dear Mr. Slater:

Please find enclosed four copies of the Revised Final Amended Community Relations Plan. Appendix A – Contact List of Key Community Leaders and Interested Parties has been updated to reflect the outcome of the November 2006 elections. A DVD/CD containing the electronic files is affixed to the back cover of each document. The revised document is posted on the website and has been forwarded to the Information Repository in Spartanburg.

Sincerely,
ZAPATAENGINEERING, P.A.

Dear Sir or Madam:

Enclosed, please find one copy of the Revised Community Relations Plan for the former Camp Croft, to be maintained in the Information Repository. We request that you mark the document "For In-House Use Only." Please discard the submittal dated September 2006.

Please contact me at (704) 358-8240 if you have any questions.

Sincerely,
ZAPATAENGINEERING, P.A.

1.0 INTRODUCTION AND BACKGROUND

1.0.1 This Community Relations Plan (CRP) sets forth a site-specific program to establish a communication and information exchange among the U.S. Army Corps of Engineers, Charleston District, U.S. Army Engineering and Support Center, Huntsville (USAESCH), federal, state, county and community agencies, and the public. Effective communication is essential for maintaining community understanding and support for the Defense Environmental Restoration Program - Formerly Used Defense Sites and for implementing a successful munitions response (MR) program. This plan provides for communication between the Corps of Engineers and local citizens, businessmen/women, elected officials and leaders from surrounding communities. CRP activities will be conducted in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the Superfund Amendments and Reauthorization Act (SARA) of 1986, EP 1110-3-8 *Public Participation in the Defense Environmental Restoration Program (DERP) for Formerly Used Defense Sites (FUDS)*, December 1999, and according to the agreements between the U.S. Army, the Environmental Protection Agency (EPA) and the South Carolina Department of Health and Environmental Control.

1.0.2 The CRP's goal is to establish two-way communication between the U.S. Army Corps of Engineers (COE) and residents of surrounding communities regarding scheduled munitions and explosives of concern (MEC) removal activities at the Former Camp Croft. Additional goals of this CRP include keeping residents of the surrounding communities informed of planned and ongoing activities at the project site and providing a means whereby citizens and agencies can interact with COE staff and assist in resolving issues of public interest and concern. The purposes of the CRP include:

1. Providing for the exchange of information regarding the MEC removal activities proposed for the project site.
2. Soliciting comments and involvement from the public, its elected and civic leaders and concerned agencies regarding the program.
3. Providing a centralized point of contact for the public and the media to express concerns and propose an effective communication network for distributing desired information regarding remediation matters at the project site.
4. Providing the opportunity for members of the media to visit the site and report their findings to the public, and to promptly answer questions from the public and the media.

1.0.3 This plan outlines the public involvement objectives; prescribes specific policies and procedures governing public involvement activities related to removal actions; assigns responsibility for planning and implementing program functions; and presents suggested communication activities and techniques to be exercised in meeting program goals. Specific goals and objectives are presented in Section 2.1.

1.1 LOCATION

The former Camp Croft is located approximately five miles southeast of Spartanburg, South Carolina, and encompasses approximately 19,045 acres. Currently, 7,088 acres of land comprise Camp Croft State Park Natural Area, 4,936 acres are used for farming, and 256 acres are used by private industry, while 6,764 acres constitute private residential property.

1.2 HISTORY

1.2.1 On Nov. 4, 1940, the War Department announced that a new training center would be located in Spartanburg County, South Carolina. Camp Croft Infantry Replacement Training Center (IRTC) was officially activated on Jan. 10, 1941, with housing for 20,000 trainees and support personnel. Camp Croft IRTC consisted of two general areas: a series of firing ranges and a troop housing area with attached administrative headquarters. Camp Croft IRTC served as one of the Army's principal IRTCs where approximately 250,000 Soldiers were trained. Camp Croft was also a prisoner of war camp during World War II. The installation was declared surplus to the Army's needs in November 1946 and excessed to the War Assets Administration in 1947.

1.2.2 The former Camp Croft was used for a variety of different purposes. It had at least 11 live ammunition-training ranges used for small arms ammunition, anti-tank rockets, anti-aircraft artillery, 60-millimeter (mm) infantry mortars, and 81 mm infantry mortars. The training range impact areas comprised a total of 16,929 acres.

1.2.3 The following MR activities have occurred since the inception of the Community Relations Program at the former Camp Croft 1996. Two Engineering Evaluations/Cost Analyses (EE/CA) have been completed for the former Camp Croft. Areas of investigation are divided into smaller, manageable areas referred to as ordnance operable units (OOU's). Munitions removal has occurred at OOU3 and OOU6 per the recommendations of the EE/CA and subsequent Action Memoranda.

Phase I - January 1996
Action Memorandum dated February 1996
Phase II - January 1998
Phase I Removal Actions in Wedgewood 1996 - 1997
Action Memorandum dated March 1999
Munitions Clearance at OOU6 1998 - 1999
Phase II Removal Actions in Wedgewood 1999 - 2000, 2005 - 2006

1.3 PROJECT OBJECTIVE

To encourage local community involvement during MEC removal activities proposed for the former Camp Croft.

1.4 PRIMARY PARTICIPANTS

- U.S. Army Corps of Engineers, Charleston District
- U.S. Army Engineering and Support Center, Huntsville (USAESCH)
- Restoration Advisory Board (RAB)
- Members of the Community
- RAB Contractor

2.0 PUBLIC INVOLVEMENT PROGRAM

2.1 GOALS AND OBJECTIVES

2.1.1 The goal of this CRP is to provide an effective and operational mechanism for communication and the exchange of information among the Corps; the local community, contractors, and diverse federal, state, county and local agencies. This CRP has been designed to fulfill requirements of the following references:

- The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended, including Section 117 of the Superfund Amendments and Reauthorization Act (SARA) of 1986 (public Law 99-499, October 17, 1986).
- The National Contingency Plan, February 1990, Subpart B, Responsibility and Organization for Response, Section 300.155; and Subpart E, Hazardous Substance Response, Sections 300.415.
- The EPA publication *Community Relations in Superfund: A Handbook*, Office of Emergency Remedial Response, January 1990.
- EP 1110-3-8 *Public Participation in the Defense Environmental Restoration Program (DERP) for Formerly Used Defense Sites (FUDS)*, December 1999

2.1.2 This CRP has the following specific objectives:

- Ensure the public understands that safety is the highest concern to the Corps.
- Open and maintain a two-way dialogue between the Corps and the local community.
- Keep local residents and federal, state, county and local officials informed in a timely manner of major findings at the project site.
- Provide local residents and federal, state, county and local regulatory officials with an opportunity to review and comment on the studies to be conducted at the project site and on suggested removal actions, alternatives, and decisions.
- Keep Corps personnel informed about changes in community concerns, attitudes, information needs and activities regarding the former defense site, and use these concerns to modify the CRP as necessary.
- Serve the community's information needs. Address citizen and media inquiries. Promptly release factual information through the media and other information-dissemination techniques.
- Effectively respond to the needs of the media by providing a timely response to inquiries and requests for interviews and briefings, thereby resulting in fair and accurate reporting of Corps activities at the project site.
- Foster and maintain, through an active Public Affairs program, a climate of understanding and trust with the aim of providing information and opportunities for comments and discussion.
- Ensure two-way communication between the Corps and appropriate federal, state, county and local elected officials. Inform the RAB of results of the investigations and recommended removal actions and seek their comments.
- Provide a single point of contact for dissemination of information on the progress of the MEC activities and the munitions response program.

- Identify community issues and areas of concern. If possible, develop methods to resolve conflict, before it begins. If necessary, bring in an outside mediator.

2.2 RESPONSIBILITIES

Responsibilities for implementing the CRP are shared by:

- Chief of Public Affairs, Headquarters, U.S. Army Corps of Engineers
 - Approves media statements or visits concerning MEC projects that are of national significance.
 - Coordinates with appropriate elements, to include the Army Environmental Office, Congressional delegations, Army's Office of the Chief of Public Affairs, USAESCH, and the local Corps of Engineers Division and District, regarding information of national significance.
- Chief, Public Affairs Office, U.S. Army Corps of Engineers, Charleston District
 - Provides Public Affairs guidance and expertise to support the Public Affairs program for the MEC removal project.
 - Prepares public statements and media releases for use at major milestone achievements and during the progress of the DERP program at the project site.
 - Refers all material of national significance to HQ, U.S. Army Corps of Engineers for release to national news media, if appropriate.
 - Serves as the spokesperson and community point-of-contact and responds to local, regional and national queries.
 - Informs the project manager and resident engineer of all queries, releases, requests for public briefings, tours or site visits pertaining to the MEC project.
 - Coordinates with the project manager all responses to queries concerning program matters that require release of information not previously cleared for release.
 - Refers queries pertaining to supporting agencies to the appropriate Public Affairs office.
 - Provides the project manager and resident engineer with information copies of all released material and copies of newspaper clippings or links to online articles.
 - Working with the project manager and resident engineer, plans and coordinates onsite tours of study sites and special briefings to elected congressional representatives, city, community leaders and residents.
 - Plans, coordinates or presents informative programs relating to the MEC project studies and remediation to area civic groups.
- Chief, Public Affairs Office, U.S. Army Engineering and Support Center, Huntsville
 - Provides Public Affairs guidance, expertise and support to the Charleston District for the community relations and media relations programs concerning the MEC project site investigation and removal actions. Degree of support is determined by the local district Public Affairs Office.
 - In coordination with the Charleston District, provides, as required, prepared news releases for use at major milestone achievements during progress of the site investigations and removal actions.
 - Refers to the Charleston District for clearance and/or coordination of all materials intended for public release, which have not been previously cleared or specifically authorized for release in the CRP or in subsequent statements and Public Affairs plans.

- Informs the Charleston District of any queries, releases or proposed media visits to the project site concerning this program.
- Coordinates all congressional queries and responses with the Charleston District and other agencies as required.
- Project Manager, Charleston District, and Project Manager, USAESCH are responsible for providing the following for the public involvement program:
 - Funding
 - Information about the project
 - Project updates
 - Coordination with various agencies
- ZAPATAENGINEERING (RAB Contractor) is responsible for developing the RAB Work Plan and Community Relations Plan for the former Camp Croft. ZAPATAENGINEERING will notify the public of the scheduled meetings, work with the RAB chair to establish the agenda, secure meeting logistics, prepare project-related presentations, ensure transcripts of the meeting are recorded, and resolve issues raised by the board.
 - With assistance from the Project Manager and in coordination with the Charleston District Public Affairs Office, ZAPATAENGINEERING will schedule and coordinate all necessary requirements for implementation of community meetings.
 - ZAPATAENGINEERING will distribute fact sheets, reports and other pertinent information to the information repositories.

2.3 COMMUNICATION ACTIVITIES AND TECHNIQUES

To ensure success in a public involvement program, there must be a two-way information network and public participation. Providing relevant and accurate information to the affected public is essential to maintaining public trust. Sections 2.3.1 and 2.3.2 present methods and techniques for implementing such a system.

2.3.1 Agency Communication Techniques

2.3.1.1 Effective interagency communication is essential for a coordinated information campaign. The CRP is designed to provide effective communication and information exchange with the Corps, county and the surrounding communities, area residents and the general public and the media.

2.3.1.2 Agency interaction and communication techniques will include:

- Specific Milestone Meetings - These meetings may be held, as appropriate, with the Corps, EPA, state environmental agencies and local regulators, and the public as appropriate, to review project-related technical/safety issues and to identify and resolve areas of concern.
- Telephone Conference Calls - Conference calls may be held as needed to keep appropriate agencies informed of project activities.
- Media and Fact Sheet Releases - Any party issuing a news release, fact sheet or other pertinent information regarding any of the work at the project site will coordinate the contents of such documents with the U.S. Army Corps of Engineers, Charleston District Public Affairs Office prior to their issuance. Emails/ fax transmissions may help expedite coordination for response to media or public inquiries.

- Meeting Announcements – Public notice of upcoming meeting will be announced at least two weeks prior to ensure maximum agency and public participation in the meeting. The schedule and location of meetings will be posted on the project Website at www.campcroft.com and via display advertisements in the Spartanburg Herald Journal. Meeting announcements will also be mailed to all entities on the project mailing list, including regulators, businesses, residents and landowners.

2.3.2 Local Community and Media Communication Techniques

To ensure effective interaction between the Corps and the local community, the following public involvement efforts may be conducted:

2.3.2.1 Fact Sheets/News Releases

2.3.2.1.1 Fact sheets and news releases will be distributed to those on mailing lists, area residents, citizen groups, regulatory officials, elected/civic officials and local and regional media, whenever events warrant such releases. At a minimum, news releases will be made upon award of contracts, and upon initiation of actual work on varying phases of the project. Both news releases and fact sheets will be prepared and released upon completion of work phases, such as Engineering Evaluation/Cost Analysis (EE/CA), decision documents, and completion of remedial designs and removal actions. Fact sheets on the EE/CA results must be made two weeks prior to initiation of a public comment period as required by EPA. Fact sheets relating to the EE/CA must describe the alternatives considered and offer the Corps's preferred alternative for public comment. An updated fact sheet will be prepared after the agency selects removal alternatives.

2.3.2.1.2 Fact sheets/news releases, in general, will address the concerns as expressed by the local community and will include status of studies and removal actions, updates on schedules and special interest items. Other fact sheets will be issued on an as-needed basis. The fact sheets and copies of news releases will also be placed in the information repository.

2.3.2.2 Response to Inquiries

The Charleston District Public Affairs Office will serve as a point of contact for direct calls from citizens seeking information on the studies. The Charleston District Public Affairs Office, working in conjunction with the project manager, safety specialist contractor, and with assistance from the Huntsville Center Public Affairs Office, will be responsible for coordinating and directing responses to the community inquiries.

2.3.2.3 Program for Civic Groups/Organizations

Slide and informational programs may be presented upon request to civic groups at their regularly scheduled meetings, in coordination with the Corps. The history of the former defense site, as well as environmental studies, should be included in the programs.

2.3.2.4 Special Briefings

When appropriate, special project briefings will be given by the Corps of Engineers to local officials to review project goals and accomplishments. Such meetings may be held at a local public meeting site (i.e. City Hall, City Council chambers) at a time mutually acceptable to Corps representatives and local officials. If more practicable, the Corps may provide a briefing

during local town meetings. Such briefings provide an information pool for elected leaders to answer constituents' inquiries. Such meetings will be coordinated by the Charleston District Public Affairs Office with local and technical support provided by the Huntsville Center, on an as-needed basis.

2.3.2.5 Information Repositories

Information repositories are where documents pertaining to the MEC response actions at the project site are stored and available for public inspection and copying. The public has access to documents such as the CRP, project work plans, the EE/CA documents, responsiveness summary, decision documents, facts sheets, removal design, removal reports, and news releases. These documents, along with public meeting transcripts, are available for public review at designated Information Repository (Appendix B) and the electronic repository on the project Website at www.campcroft.com.

2.3.2.6 Community Meetings

2.3.2.6.1. Public meeting locations in proximity to the project site are identified in Appendix B. Both facilities provide audio-visual equipment, have adequate seating, and are handicap-accessible. RAB meetings are open to the public and are conducted on a bi-annual to quarterly basis.

2.3.2.6.2 Other techniques that are recommended, when appropriate, include:

- **Good Neighbor Program** - Property owners and renters of lands adjacent to or on the project site may be mailed updates on site investigations and proposed removal actions, whenever deemed appropriate by the Corps. If sufficient interest in the study is expressed by these residents, a special briefing and a tour of the site may be arranged by the Charleston District. A site visit with an appropriate briefing would place the project into perspective and diminish fears about ordnance and explosives or adverse impacts to health and safety.
- **Onsite Tours** - Tours may be held on an as-needed basis with local citizens, local and state officials, congressional representatives and the media. The Charleston District project manager and Public Affairs Office will determine when such tours are beneficial to enhancing public understanding of the investigations, and the tour will be organized by the Charleston District Public Affairs Office.
- **Special Concerns Workshops/Restoration Advisory Boards** - In the past, several individuals and/or groups have been identified by the media as expressing unusual concern or even hostility about diverse regional activities that may impact upon the environment. If such groups or individuals emerge in the course of this project, they should be contacted directly by the Charleston District Public Affairs Office to participate in a special concerns workshop or RAB. If necessary, the workshop would allow for an open forum for the expression of concerns relating to the investigation or removal activities and will allow interaction in a productive environment.

2.3.2.6.3 Participants may include individuals or groups expressing public concern about the project, the Charleston District Public Affairs Office, the Corps project manager, Huntsville

Center representatives, and if deemed practical, representatives from the state and local regulators, EPA, and the removal contractor.

2.3.2.6.4 In the course of such special concerns workshops, a Special Concerns Task Force will be developed comprised of selected participants from the workshop to help address future groups that may express concerns about the environmental issues and safety concerns relating to MEC at the project site.

3.0 COMMUNITY BACKGROUND

3.1 COMMUNITY DEMOGRAPHICS AND EMPLOYMENT

3.1.1 The area known as Spartanburg County was formed in 1730 when a treaty marking the boundary between the province of South Carolina and the Cherokee Nation was signed. Today the boundary separates Spartanburg and Greenville Counties.

3.1.2 As of the Census of 2000, there were 253,791 people in Spartanburg County. Employment, by category, is as follows:

Agriculture, Forestry, Fishing and Hunting, and Mining	.5%
Construction	8%
Manufacturing	28%
Wholesale/Retail Trade	16%
Transportation and Warehousing, and Utilities	5%
Information	2%
Professional, Scientific, Management, Administrative, Waste Management Services, Finance, Insurance, Real Estate, and Rental and Leasing	10%
Educational, Health and Social Services	17%
Arts, Entertainment, Recreation, Accommodation and Food Services	7%
Other Services	7%

3.1.3 Of the 2000 Census civilian labor force of 126,914, 64.3 percent were employed. The County Family Median Average (2000 Census) was \$37,579. There are approximately 520 manufacturers in Spartanburg County. The county has the highest per-capita diversified foreign investment in the United States. More than 80+ international companies representing 18 countries have offices and/or manufacturing facilities in Spartanburg County.

3.2 COMMUNITY INTERVIEW PROGRAM

3.2.1 In 1995, ZAPATAENGINEERING, P.A. conducted a series of telephone surveys in an effort to determine the level of knowledge and interest in the MEC removal activities underway at the former Camp Croft. Residents were also informed of the opportunity to become involved in the RAB. Telephone calls were made during the day as well as early evening hours. The initial 14 telephone calls were to residents selected randomly from the Spartanburg telephone directory, while the remaining telephone calls were to residents living in the immediate area of the former Camp. A CD-ROM city telephone directory was used to sort, by the individual streets that border Croft State Park, names and telephone numbers of area residents. Telephone numbers were randomly selected to ensure a diverse mix of interviewees.

Number of telephone calls attempted (including no answer)	98
Number of people spoken to	44

Number of people interested in receiving additional information	25
Number of people who were not aware of the MEC removal project	6

3.2.2 A project-specific public Open House was held on June 8, 1995. Thirteen individuals signed the attendance sheet. The issuance of fact sheets and news releases, and conducting telephone interviews with members of the community have served to increase the awareness of the removal activities and the objectives of the RAB. Fourteen individuals signed the attendance sheet at the Oct. 24, 1995 Open House. A RAB was established in late 1995. In addition to the 18 RAB members, 17 private citizens attended the first RAB meeting on Jan.16, 1996.

3.2.3 The RAB has been active through early 2006. The term of each RAB is two years, and RAB membership has diminished over the years from 18 to seven. Average public attendance at the RAB meetings is 15 – 20 individuals. The following lists the number of public meetings conducted since 1995. Meeting transcripts are available for review at www.campcroft.com.

YEAR	NUMBER OF RAB MEETINGS
1995	Two Public Open Houses
1996	8
1997	4
1998	2
1999	4
2000	3
2001	2
2002	2
2003	2
2004	2
2005	2
2006	1 (as of July 2006)

3.2.4 In November 2005, Community Interest Forms for the 2006 – 2008 RAB were widely disseminated. Nineteen forms were submitted for consideration and are pending Corps approval.

3.3 AVAILABLE MEDIA RESOURCES

A list of names, addresses and phone numbers of the newspapers television stations and radio stations is presented in Appendix A.

3.4 COMMUNITY ISSUES AND CONCERNS

Over the last 10 years, community issues/concerns have focused on the length of time to complete MEC removals due to funding constraints. Property owners have expressed frustration that the Corps revisits the same parcels several times before a clearance is complete. In addition, individuals attending the RAB meetings have identified areas of concern beyond those identified in the EE/CA documents that they would like to see addressed. Concerns identified range from

anecdotal information to confirmed MEC finds/responses by the Spartanburg County Sheriff's Department.
